

App.jsx

```
import Counter from "./Counter";

function App() {

  return (

    <>

      <Counter />

    </>

  );

}

export default App;
```

Counter.jsx

```
import { useReducer, useEffect, useRef } from "react";

function reducer(state, action) {

  switch (action.type) {

    case "INCREMENT":

      return { count: state.count + 1 };

    case "DECREMENT":

      return { count: state.count - 1 };

    case "RESET":

      return { count: 0 };

    default:

      return state;

  }

}
```

```
}
```

```
function Counter() {  
  const savedCount = localStorage.getItem("count");  
  
  const initialState = {  
    count: savedCount ? JSON.parse(savedCount) : 0,  
  };  
  
  const [state, dispatch] = useReducer(reducer, initialState);  
  
  const inputRef = useRef(null);  
  
  useEffect(() => {  
    localStorage.setItem("count", JSON.stringify(state.count));  
  }, [state.count]);  
  
  function handleFocus() {  
    inputRef.current.focus();  
  }  
  
  return (  
    <div>  
      <h1>Count : {state.count}</h1>  
  
      <button onClick={() => dispatch({ type: "INCREMENT" })}>  
        Increment  
      </button>
```

```
<button onClick={() => dispatch({ type: "DECREMENT" })}>
  Decrement
</button>
