

TextInput.jsx

```
import React, { useState } from "react";

function TextInput() {
  const [text, setText] = useState("");

  return (
    <div style={{ padding: "20px" }}>
      <h2>Live Text Preview</h2>

      <input type="text" placeholder="Type something..." value={text}
        onChange={(e) => setText(e.target.value)}/>

      <h3>Preview:</h3>
      <p>{text}</p>
    </div>
  );
}

export default TextInput;
```

Toggle.jsx:

```
import React, { useState } from "react";

function ToggleDay37() {
  const [darkMode, setDarkMode] = useState(false);
  const toggleTheme = () => { setDarkMode(!darkMode); };
  return (
```

```
<div
  style={{ height: "100vh", backgroundColor: darkMode ? "#222" : "#fff",
    color: darkMode ? "#fff" : "#000", display: "flex", flexDirection: "column",
    justifyContent: "center", alignItems: "center", transition: "0.3s"}}>
  <h1>{darkMode ? "Dark Mode" : "Light Mode"}</h1>

  <label>
    <input type="checkbox" checked={darkMode} onChange={toggleTheme} />
    Toggle Theme
  </label>
</div>

);
}

export default ToggleDay37;
```

Output:
